RESEARCH FOCUS

Explainable AI | Federated Learning | Multimodal AI | Healthcare AI | Mental Health AI | Efficient AI Inference

SKILLS

AI Research & ML

Machine Learning | Deep Learning | Explainable AI (SHAP, Integrated Gradients) | Federated Learning | NLP | LLM Integration | Agentic AI | Prompt Engineering

AI Inference & Deployment

LLM Serving | Quantization & Optimization | GPU Inference | Inference APIs | Latency & Throughput Tuning | Cloud Deployment | Containerization

PROFILE 01

I'm an AI researcher and specialist working on explainable, privacy-preserving AI, with a focus on mental health screening and healthcare. My research combines structured and multimodal data with federated learning, so models can learn from sensitive data without centralising it, and uses SHAP and Integrated Gradients so their decisions can be audited.

As an inference engineer, I take models from notebook to production: serving LLMs and ML models behind inference APIs, optimizing them with quantization, and deploying them on GPU and cloud infrastructure with attention to latency and cost.

I apply this in World Bank-funded public-sector systems in Punjab and at Agnific, my software house. I'm preparing to start a PhD.

EXPERIENCE 02

Assistant Manager IT
09/2023 – Now

Punjab Rural Municipal Services Company (PRMSC) · Government of Punjab

- Building systems for the World Bank-funded Punjab Rural Sustainable Water Supply & Sanitation Project (PRSWSSP).
- ERP/MIS, water quality monitoring, grievance redressal, and water billing for 2,000 villages.
- Monitoring & evaluation systems and AI-driven workflow automation.

Head of Digital Software Engineer / AI Engineer
12/2025 – Now

Globexisimpex

- Leading AI automation and ERP platforms built with Python, Flask and React.
- Designing ML/NLP modules integrated into business workflows.

AI Engineer / IT Consultant
04/2026 – 09/2026

Punjab Food Authority (PFA)

- Introduced AI/ML capabilities at PFA.
- Built sample tracking and warehouse chain-of-custody systems.

Founder
Now

Agnific · Software house

- Leading AI projects and client development end to end.

Data Engineer
08/2023 – 05/2024

Telelinkz Communications

- Built Python scraping pipelines with Selenium and BeautifulSoup.

Software Engineer
2023

Digital Frontier

Data Analyst Intern
2023

PTCL

Junior Software Engineer
2022 – 2023

The Eisaar Trust

Languages

Python · Java · C++ · JavaScript · TypeScript · SQL · Dart

Web & Mobile

React · Next.js · Flask · Flutter

Data

Data Engineering · EDA · Visualization · Web Scraping

EDUCATION

BS Software Engineering
The Superior University, Lahore
2019 – 2023

- CGPA 3.22 / 4.00
- Final year project (Robo-Litation) funded by the Pakistan Science Foundation

HONOURS & AWARDS

Pakistan Science Foundation research funding
Approximately PKR 3.7 million awarded to Robo-Litation, my BS final year project: an AI-powered smart physiotherapy glove for stroke rehabilitation.

PUBLICATIONS

03

[1] Published · First author · Springer Nature

Towards Transparent Mental Health Insights: An Explainable AI Model for Career-Related Depression and Anxiety Among University Students Using Structured and Multimodal Data
Arsham Azam et al.
doi:10.1007/978-3-032-18834-2_26 arXiv:2606.21474

[2] Published

Unveiling Data Scientist Salaries: Predictive Modeling for Compensation Trends
doi:10.56979

RESEARCH IN PROGRESS

04

- **Explainable AI for early autism detection from facial expressions**
  An interpretable facial-expression model to support early autism screening, developed with practitioners. With Amin Maktab / The Eisaar Trust.
- **Explainable AI framework for early Down syndrome detection from facial images**
  A transparent detection framework that highlights the facial features driving each prediction.
- **NeuroLynk AI**
  An explainable agentic AI framework for detecting career-related distress in university students.

SELECTED PROJECTS

05

AI/RESEARCH
Robo-Litation
PSF funded · ~PKR 3.7M
AI-powered smart physiotherapy glove for stroke rehabilitation, paired with a mobile app for guided exercises and progress tracking. BS final year project.

AI/RESEARCH
Autism Early Detection AI
In use at rehab centres
Explainable facial-expression model for early autism screening, adopted by rehabilitation centres in Lahore.

GOVERNMENT SYSTEMS
PRSWSSP Daily Progress System
Field reporting app with a live dashboard and automatically emailed progress reports for a World Bank-funded program.

GOVERNMENT SYSTEMS
PRMSC M&E System
Multi-platform monitoring and evaluation system tracking program indicators across rural Punjab.

GOVERNMENT SYSTEMS
PFA Sample Tracking & Warehouse Inventory
Sample tracking and warehouse inventory with full chain-of-custody for the Punjab Food Authority.

CLIENT WORK
SPY 0DTE Risk Filter
Flutter app that combines OpenAI GPT with Alpaca market data to flag risk on zero-days-to-expiry SPY options trades.

CLIENT WORK
BlockOra
Crypto-backed lending and referral platform.

CLIENT WORK
LLM Chatbot & Agentic Automation
LLM-powered chatbot and agentic workflows that automate multi-step business processes.
